

Keep your equipment running on point with NTN single-point automatic lubricators

Choose automatic lubrication to safely apply the correct amount of lubricant on time and automatically

Technical Details	READY	SMART	DRIVE
Description	Gas powered single point lubricator	Electrochemical powered single point lubricator	Electromechanical powered single point lubricator
Lubricant Volume	125 cc (4.23 oz) 60 cc (2.03 oz)	130 cc (4.40 oz)	60 cc (2.03 oz), 120 cc (4.06 oz), 250 cc (8.45 oz)
Lubricant Discharge Period	1, 2, 3, ..., 12 months	1, 2, 3, ..., 12 months	1, 2, 3, ..., 12 months
Operating Temperature Range	-4°F to 140°F (-20°C to 60°C)	-4°F to 140°F (-20°C to 60°C)	14°F to 140°F (-10°C to 60°C)
Pressure Build-up	max. 5 bar / 73 psi	max. 6 bar / 87 psi	max. 6 bar / 87 psi
Technology	<ul style="list-style-type: none"> Gas powered 	<ul style="list-style-type: none"> Electrochemical gas powered Electronic temperature compensation 	<ul style="list-style-type: none"> Electromechanical drive Replaceable batteries
360° indicator lights	No	No	Yes

Improved Safety, Reliability, and Productivity means Real Cost Savings

Safety

NTN automatic lubricators can help reduce personnel exposure to hazardous situations such as heights, confined spaces, and areas that can pose burn risks.

Reliability

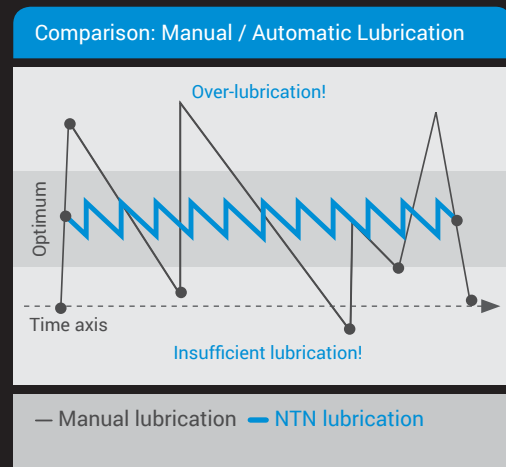

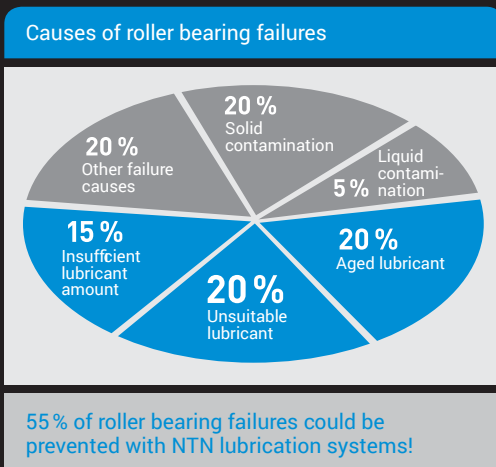

As much as 55% of bearing failures are a result of poor lubrication. NTN single-point lubricators will deliver the right amount of lubricant at the right time to keep your equipment running reliably.

Productivity

Get your team working on the stuff that counts and leave lubrication to the experts. Once installed, NTN single-point lubricators will take care of all the work.

Real Cost Savings

The benefits of implementing NTN single-point lubricators into your preventative maintenance plan deliver real cost savings. With millions of dollars in cost savings delivered to our customers over the years, NTN has the experience and products to help your organization improve its bottom line.
